Professional Summary

Enterprise Cloud Security & Network Isolation

 Core Profile

Cloud Security Engineer and AWS Certified Cloud Practitioner with practical experience across AWS and Azure cloud networking, VPC/VNet architecture, and Network Security Groups (NSGs). Experienced in managing endpoint compliance with Microsoft Intune, assisting in drafting cloud security policies, and isolating internal workloads from public exposure.

Work Experience

Security Analyst

 July 2026 – Present

Sagarsoft (India) Ltd. (Deputed to Sarral) | Enterprise Cloud Security & Compliance

- Configured and managed AWS VPCs, subnets, route tables, and Security Groups to establish structured network boundaries and secure cloud environments.
- Implemented Azure Network Security Groups (NSGs), route tables, and VNet peering to enforce network segmentation between internal and public-facing workloads.
- Managed device compliance and endpoint security baselines using Microsoft Intune, ensuring organizational security standard adherence.
- Assisted in drafting and maintaining cloud security policies, access controls, and boundary guardrails using AWS Organizations SCPs and IAM roles.

Cyber Security Intern

 July 2025 – July 2026

Sagarsoft (India) Ltd. (Deputed to Sarral) | Cloud Security & Network Telemetry

- Earned AWS Certified Cloud Practitioner credential while completing hands-on training on AWS and Azure cloud security fundamentals.
- Assisted senior engineers in auditing cloud environments for unencrypted storage, inactive IAM keys, and open security groups.
- Trained on configuring foundational VPCs, Azure VNets, subnets, and NSGs, understanding network isolation and routing principles.
- Analyzed VPC Flow Logs and cloud firewall telemetry to observe traffic patterns, identify unauthorized connection attempts, and learn triage procedures.

Technical Skills

Cloud Networking:

AWS

Microsoft Azure

VPCs & VNets

Subnets & Routing

VNet Peering

Cloud Security:

Azure NSGs

AWS IAM & SCPs

Zero-Trust Isolation

VPC Endpoints

AWS WAF

Endpoint & Governance:

Microsoft Intune

Policy Drafting

Security Baselines

Cloud Auditing

IaC & DevOps Tools:

Terraform

CloudFormation

Docker

VPC Flow Logs

Linux Admin

01 / PERIMETER

Edge Security Shield

Repository

AWS WAFAmazon CloudFrontLayer 7 DefenseALB Prefix ListsCloudWatch

> Deployed **Amazon CloudFront** and **AWS WAF** at the global edge to inspect Layer 7 traffic and actively block OWASP Top 10 web vulnerabilities before hitting origin servers.

> Enforced strict AWS WAF managed rule groups (**SQLiRuleSet**, **KnownBadInputs**) with active Block actions, validated via simulated SQL injection query termination (403 Forbidden).

> Hardened backend **Application Load Balancer** security groups to exclusively accept traffic originating from CloudFront Prefix Lists (`cloudfront.origin-facing`), preventing perimeter bypass.

02 / AIRLOCK

Secure Storage Airlock

Repository

Azure BastionPrivate EndpointsVNet PeeringPrivate DNS ZoneAzure Storage

> Architected a Zero-Trust **Hub-and-Spoke network topology** utilizing Azure Bastion and VNet peering to establish an isolated jumpbox management environment.

> Provisioned **Azure Private Endpoints** and **Private DNS Zones**, routing all storage account transactions entirely over the private Microsoft backbone without public internet exposure.

> Verified network containment via `nslookup` diagnostics, proving public DNS queries were blocked by firewall rules while internal requests routed to private `10.1.2.x` IPs.

03 / ZERO-TRUST

Zero-Trust Network Architecture

Repository

Azure VPN GatewayMicrosoft Entra IDPrivate DNS ResolverNRPT PoliciesApp Service

> Engineered an **"Invisible Frontend"** perimeter by disabling all public ingress on Azure App Service and isolating application workloads behind Private Endpoints.

> Deployed a Point-to-Site **Azure VPN Gateway integrated with Microsoft Entra ID**, enforcing multi-factor authentication (MFA) and device-compliance conditional access.

> Configured **Azure Private DNS Resolver with Name Resolution Policy Table (NRPT)** rules to intercept internal `.azurewebsites.net` queries without disrupting split-tunnel browsing.

 Education & Certifications

B.Tech in Computer Science and Engineering

Gokaraju Rangaraju Institute of Engineering & Technology (GRIET), Hyderabad

2021–2025

GPA: 8.05 / 10.00

Professional Certifications

> **AWS Certified Cloud Practitioner** — Amazon Web Services

> **AWS Databricks Platform Architect** — Databricks Academy

> **AWS Certified Solutions Architect (Associate)** — In Progress (Target Exam: September 2026)
